

Project Overview

In this project, you will create a **multi-page website** using **HTML**. The goal is to practice the foundational concepts of structuring web pages while ensuring that your site is organized, easy to navigate, and visually coherent, as we discussed in the tutorial and lab. You will develop a website based on a theme of your choice.

Project Guidelines

The project must include:

- Each team must consist of **4-5 members** all registered in the **same lab section**
- Each team member must create **2 Webpages**, and each webpage should have a **different** design/layout
- Additional to the 2 webpages, **ALL team members must participate** in the making of the "About" webpage and the "Home" page.
 - **The About page** should include the names of the team members, etc
 - **The Home page** should allow you to navigate to all the webpages.
- All the tags discussed in the tutorial and lab.
- If you want to choose ideas other than the ones already listed in the ideas.txt file run the idea first by your lab TA.
- if you want to register the project with number of members different than **4-5 members**, please contact either:
 1. Eng/ Donia Metwalli email: **doniametwalli@nu.edu.eg**
 2. Eng/ Yusuf Fathi email: **yismail@nu.edu.eg**

Code Formatting and Organization:

- Code must be well organized and readable

Project Support Tutorial: **(2.5 Points)**

- During the Project Support Tutorial, students are required to show the progress of their project (demo).

Discussion Grading **(10 Points)**:

- Students will be graded as follows:
 - Individual work, including the **2 webpages** students are required to create. They will be graded based on the correctness of the code and design of the webpage. **(5 Points)**
 - Teamwork, including their participation in the **Home** and **About** pages, as well as the general design and flow of the entire website and idea. **(5 Points)**

Bonus: **(2.5 Points)**

- Adding CSS to your project with understanding and discussion.

Submission Requirements:

- Should be submitted as a **zip** file that includes:
 - All the files used in the project (html files, images, etc)
 - Video (Screen Recording) of your Webpages as they work (a demo)

Total grades: 12.5 + 2.5 bonus points

Example Ideas:

1. Personal Profile Page
2. Favorite Hobby Website
3. Simple Travel Destination Guide
4. About My Favorite Movie
5. Basic Portfolio Page
6. Favorite Book Review Site
7. Simple Food Recipe Website
8. Introduction to My City

9. Basic Blog with Static Pages
10. Music Playlist Showcase
11. Simple Animal Information Site
12. Favorite Sports Team Website
13. Basic Event Invitation Page
14. My Favorite TV Show Website
15. Educational Resources for a School Subject
16. Favorite Vacation Spot Guide
17. Simple Restaurant Menu
18. My Family Tree Website
19. A Day in My Life Website
20. Basic Art Gallery Website
21. Introduction to My Favorite Game
22. Simple Travel Itinerary
23. Movie Poster Gallery
24. My Favorite Place in the World
25. Simple Student Resume
26. Local Park Guide
27. Basic Pet Care Website
28. My Favorite Sports Player Profile
29. Music Album Showcase
30. Simple How-to Guide Website
